

I think given plenty of practice I could be good at it but as a novice who is bound to make mistakes it's an incredibly unforgiving sport- once you've lost some speed or momentum it is truly gone with no chance of getting it back.

Having always lived in the city I've never had any chance to experience a non-asphalt surface, so whilst it was fun and a break from the norm- bring on the next event on the hard stuff!"

John also commented on the efforts from co-DRIVE winner Julian.

"Once again another superb effort from Julian and I think he showed the potential to be a true competitor in this discipline should he choose to dedicate some time to it... and he beat me this time so I'm livid!!"

It's good to see a mutual respect between the boys and a friendly rivalry developing! MSF members Duncan Stephens, Laura Wilks and Josh Veale were also there on the day lending support in between competing themselves! Thanks to them for the help they provided on the day.

You also may have noticed our very own branded tent at the site of the event-this will be going to numerous events over the sporting year so please come and say hi if you see us there!

At our meeting this month we discussed numerous projects for the future. We are currently in the process of getting DRIVE sorted for 2009. We are hoping to run the scheme again to the same basic structure but with a few changes and improvements! Watch this space.

We also had discussions about National Motorsports Week 2008 and where we are going to make our presence known! Look out for us at the RossSolo at Ross-on-Wye on Sunday the 17th August.

We have been approached by a car club to get involved in a Council run scheme in Dudley that will hopefully run over the next 12months and since our meeting we have also been approached to run a stand at similar show scheme at Abergavenny!

All I can say is watch this space, its set to be a very exciting couple of months! Until next month, happy competing.

Julian and John with the Micra and our tent!

Julian on the hills!

John on the hills!
